

Flat Earth Coin X (FECX) - Whitepaper

Introduction

Flat Earth Coin X (FECX) is a meme-driven digital asset born from the belief that the world isn't what it seems.

With a total supply of 8.1 billion tokens - one for every person on the flat Earth - FECX aims to unite skeptics, truth seekers, and curious minds in a lighthearted yet powerful decentralized movement.

Tokenomics

Total Supply: 8,100,000,000 FECX

* 10% (810,000,000 FECX) held by the founder (cold wallet, not sold during early phase)

* 90% (7,290,000,000 FECX) available for public sale via Uniswap

No team tokens. No private sale. 100% community focused.

Liquidity & Fair Launch

Liquidity is provided by the founder using ETH. Trading starts via a decentralized exchange (DEX).

All tokens except the founder's share are placed in the smart contract and progressively released.

No taxes on buys or sells - FECX supports free and fair trade.

Philosophy & Humor

Why Flat Earth? Because sometimes asking bold questions opens bold minds.

FECX embraces satire, self-awareness, and the absurd - while creating a real financial instrument.

Whether you're a believer, a troll, or just want to ride the meme wave, there's a place for you.

Roadmap (Short-Term)

* Website + Branding [done]

* Smart contract [done]

* Whitepaper [done]

Flat Earth Coin X (FECX) - Whitepaper
